

More button is actually not need for this page, only the play and Settings buttons

Settings should have, sound on or off. Music on or off. How to play instruction tab. Notifications.

Will send logo and buttons for these.

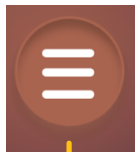

This will be what you will see when they press the settings button. Will say settings not more.

We should have the settings button here as well, will show the same screen as in the first screen.

We will put a menu tab here for where players can purchase buddies. Will send the buttons if I haven't already.

This is the menu tab.

Each level will need to be greyed out until the level before has been completed and they get their stars. Stars should appear on top of the level button.

Menu tab not needed for this page.

This is for the touch count down, that's what the number and finger represents.

This is where the level number, player lives and clock count down should be. These are just to show you where things go.

These are the power balls that players can use to help them complete levels, they will be locked for the first few levels as they won't earn any for the first 4 levels. Blue one will be stop the clock for 5 second, yellow one will slow the ball down by 23% and the pink will add 3 more touches the touch count.

This will be where players have the options to quit, restart and or continue.

Below is the company Logo.
